

STRESS FAT ATTACK:

You have love handles and a hanging belly (belly fat). You may also at times get tense, have trouble sleeping at night and wake up tired.

Your adrenal glands secrete too much Adrenaline, the Adrenaline goes to your liver where it is metabolized to Cortisol. Cortisol stops fat burning! That's why you get fat so easily, even if you eat almost nothing.

Watch the Video about our Stress Fat Attack -
<https://www.youtube.com/watch?v=cshLOeJt-Q8>

The Stress Capsule can be used on its own or combined with the Top, Bottom or All Over Fat Attack.

Let me know and I'll give you more advice about our different Stress Packs.

TenaZ Greetings ❤️
